Experience

PIAIC

Agent engineer

July 2023 - June 2026 (3 years)

Pakistan

Medvance

Artificial Intelligence Engineer

November 2025 - May 2026 (7 months)

Designed and deployed an AI agent for physicians to retrieve full patient history, run clinical research, and generate structured treatment recommendations. Built RAG pipelines over EHR data, enabling natural-language querying of medical records across multiple sources. Engineered LLM evaluation loops to measure accuracy and hallucination rates, iterating on prompts and retrieval strategies. Collaborated directly with founders to shape the product roadmap and deliver production-ready Python code over a 7-month engagement.

Education

University of Peshawar

Bachelor of Science, Computational Science

University of Peshawar

BS computer science , Programming
